

H1N1 Flu

Clinical Data Collection Forms and Templates for Collection of Information on Patients Infected with Novel Influenza A (H1N1)

May 12, 2009 3:00 PM ET

This page is designed to give clinicians access to the latest guidelines and information on the evolving novel H1N1 influenza investigation.

CDC Clinical Data Collection Forms and Templates for Collection of Information on Patients Infected with Novel Influenza A (H1N1)

The following novel Influenza A (H1N1) data collection forms are being made available for use by public health officials, and for researchers and clinicians in the medical and academic communities both in the United States and in other countries. These templates represent a variety of data collection instruments that can be used to collect information on persons with novel Influenza A H1N1 infection. The data obtained from these instruments can help characterize the disease spectrum and severity, and help to understand what factors may increase the risk for more severe disease, and may guide healthcare decisions and resource allocation.

This website will be updated as new forms become available.

H1N1 Influenza Case Report Form, v3.050109

[PDF Format \(PDF\)](#), [Word Format \(Word\)](#)

This form asked for limited information on cases and is a subset of the information requested in the "Novel Influenza Case Investigation Form" below. US state health departments have been asked to complete this form for individual cases and send the information to the CDC.
