THE VOICE OF
Communities in Need

MACHC: THE VOICE OF COMMUNITIES IN NEED

BRINGING AFFORDABLE & ACCESSIBLE CARE

*Building Stronger Communities
with the power of Health Care*

MACHC

is the voice for the future of healthcare in Maryland and Delaware, delivered through Community Health Centers (CHCs) that employs personalized comprehensive and attentive approach that emphasizes person-centered wellness, care coordination and disease prevention.

Community Health Centers (CHCs)

Are the cornerstone of the health care system in Maryland and Delaware, providing affordable and accessible essential services to our most vulnerable and under-served populations.

OUR MISSION

To advance and sustain the Bureau of Primary Health Care supported programs and other locally based safety net community health systems of care throughout Delaware and Maryland through public policy development, community education, and representing our member interests in collectively adapting to an ever-changing industry and political environment.

MACHC staff have over 40 years of collective experience working with Community Health Centers. From that experience, we have crafted dedicated work groups to assist in the specific demands of these health center roles. We offer trainings and resources for key areas of health center operations.
*See MACHC TA list.

CHC AT WORK

CHCs in Maryland and Delaware have transformed health care by using integrated, proactive provider teams and advanced health information technology to provide better care for patients.

Access

CHCs provide healthcare access to ALL patients, regardless of their ability to pay. So no matter who you are, you are always welcome at a Community Health Center.

Patient-Centered Comprehensive Care

Our trusted, safe and high quality health centers are helping their patients live healthier lives by providing comprehensive, integrated services that focus on wellness. CHCs offer a wide and complete array of services that includes primary, medical, behavioral and dental care, integrated with specialty care and other wellness services including nutrition.

CHC Board

Each CHC is governed by a board of directors, the majority of whom are patients and members of the community. This makes CHCs responsive to the needs of their individual community.
